An experienced Front-end Developer with 2 year of software development experience, who has worked extensively on the front-end aspect of web applications using React, Node, JavaScript and Vue.

## Work Experience

### Frontend Vuejs Developer

### Sigma EMP

Dec, 2021 - Mar, 2022

We transform businesses and upgrade them to the next level with proven digital tools and systems. It is a product-based Malaysian company.

- The internal project, implemented Vuejs using vue 3/router/vuex cdns with PHP builtin server.

### Frontend Vuejs Developer

### Loopbrackets

Apr, 2022 - Nov, 2022

Loopbrackets is a service-based startup running on modern workflows and practices.

- Decreased page loading time, and implemented modern stack to improve performance.
- Used modern tooling to scale projects in the future.
- Replaced JQuery with VueJs

### Frontend Developer (React | Vue)

### MidChain technologies

Dec, 2022 - May, 2023

MidChain is a service-based startup running on modern workflows and practices. I like one thing about them the project structure they follow.

- Built a school system with complete billing, and CRM features.
- Used React with Typescript. Implemented atomic design to stay the code DRY.
- Nursing portal used Vue 2 with aws cognito

## Projects

[Preview](#) [Source code](#)

### Proxyscrape

There was a website stacked with traditional technologies like jQuery and PHP. My responsibility was to convert it into a modern stack using VueJs (version 3), and Typescript (scalability).

- Vue 3
- Vuex 4
- Composition api
- Vite
- TypeScript
- Vue router 4
- SSR
- Later project was migrated to Nuxt 3 with Pinia
